DETAILED ACTIONS

EXAMINER'S AMENDMENT

1. Applicant's election of claims 1-6 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). **Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 7-8.**

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL**.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 7-8.

Abstract

"comprises" should be --includes-- Because the abstract of the disclosure is objected to because legal phraseology such as "**comprise**" is used. Correction is required. See MPEP & 608.01(b).

REASONS FOR ALLOWANCE

3. Claims 1-6 are allowed.
4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests in claims 1: preparing a plurality of FBAR chips, each FBAR chip comprising a substrate, air gap and piezoelectric layer unit, which are successively arranged, a plurality of electrode pads electrically connected to the piezoelectric layer unit, and bumps balls formed on the electrode pads in a one to one ratio; preparing a duplexer substrate having a duplexing circuit; reversing a plurality of the FBAR chips after contacting then with the duplexer substrate so that the substrates of the FBAR chips face upward, and bonding the bump balls to the duplexer substrate; forming protective structure by use of a film, the protective structures being positioned on side surfaces as well as an upper surface of the respective FBAR chips; and forming a molding portion on the duplexer substrate so as to cover the protective structures.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Tikka et al (6,407,649 B1): Monolithic FBAR Duplexer and Method of Making the same.

Ella et al (6,509,813 B2): Bulk Acoustic Wave Resonator with a Conductive Mirror.
